

Example File for Creating Bibliographies Using BibLaTeX

Brendan Apfeld

November 29, 2016

In this document I use the `biblatex` package, so I will use `autocite{}` for most citations.

For example, I could be writing here about something really interesting and need to add a citation about it (Collier 2011). Or I might need one with a specific page (Lijphart 1971, pp. 34-40). Or here's an inline citation for Sartori (1970).
